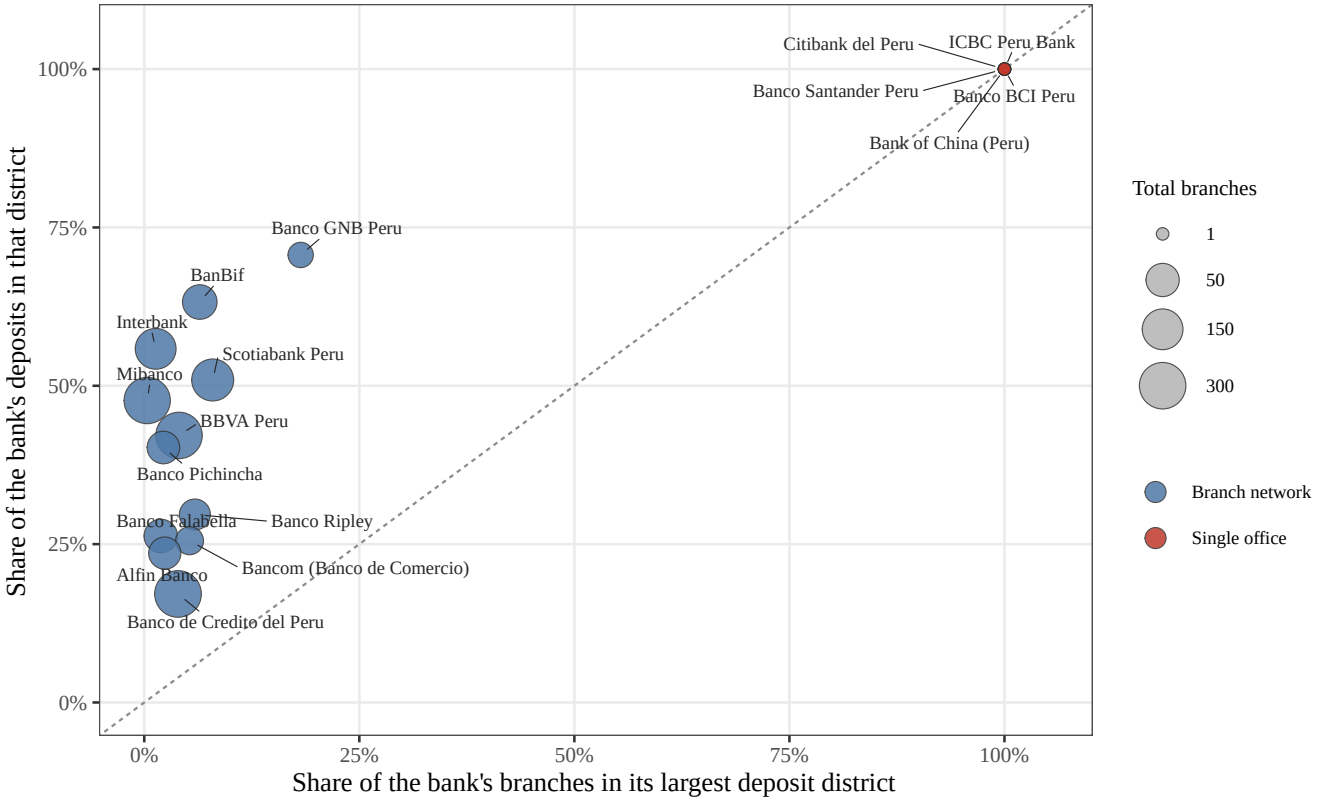
Deposit Share against Branch Share in the Largest Deposit District

Points above the 45−degree line: deposits are more concentrated than branches



SBS Boletin B−2358, December 2023. Pearson correlation 0.91 (Spearman 0.75) across all 17 banks.
Dropping the 5 single−office banks, which sit at (100%, 100%) by construction and are drawn on top of one another, leaves 0.53 (Spearman 0.31).
Marker area is proportional to the bank's total branch count.
