

Dollar Funding and Dollar Lending Across Peruvian Financial Institutions

Source: SBS statistical series, institution-level report Jan-2001 – Sep-2022. Each dot is one financial institution at end-December. Shares are foreign-currency balances over total balances; the SBS reports both MN and ME in thousands of soles, so no exchange-rate conversion is applied. Subsystem aggregates (Banca Múltiple, Empresas Financieras) are excluded. Institutions without deposits (e.g. Mitsui Auto Finance, Edpymes) have no horizontal coordinate and are dropped. The dashed line is the 45-degree currency-matching benchmark. 2021 is the last full December in the source.
