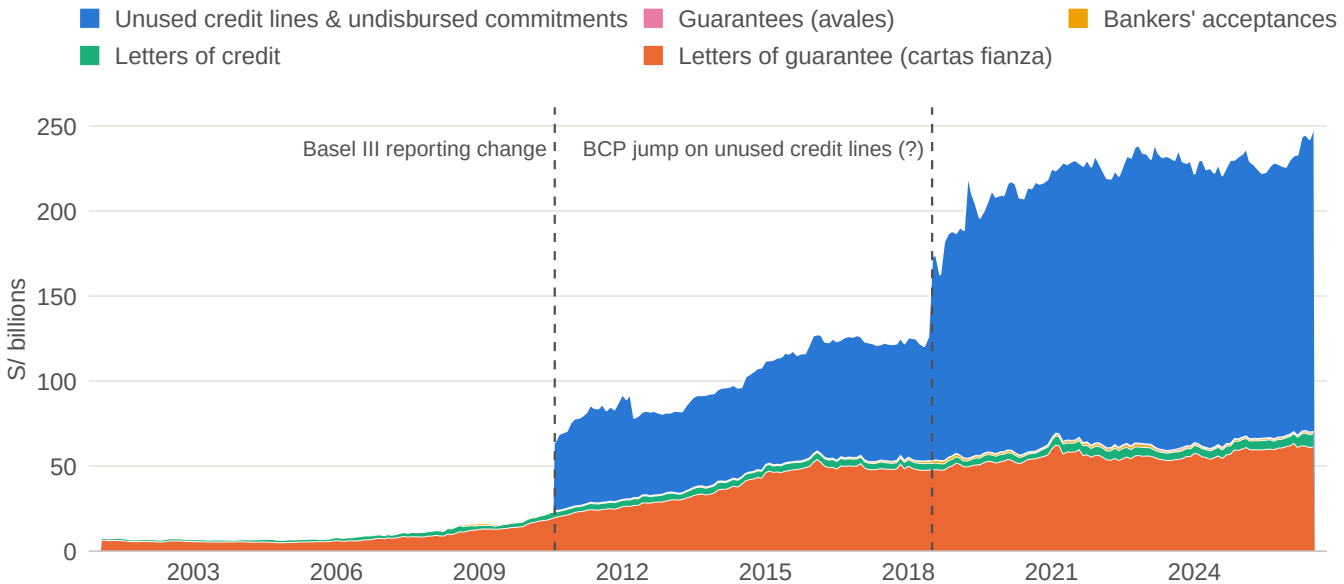
Composition of Unused Credit in the Peruvian Banking System

Creditos indirectos by category, Banca Multiple, monthly, billions of soles



Source: SBS cuadro B−2322. Category levels are derived as the published share times the published total. Unused credit lines and undisbursed commitments are not reported before July 2010 (Res. SBS 11356−2008): the category is left missing there rather than set to zero, so the step at the dashed rule is definitional, not economic.
