Population by Departamento

INEI district population, 2017 census vintage, summed to departamento

32,162,178 residents in total; Lima holds 10.3m of them (32%). The fill is log10 and each departamento carries its own count, so the numbers read independently of the colour. This is the same district register used as the per−capita denominator elsewhere in this script, so it is a fixed cross−section rather than a yearly series.
